*ALON DE GROOT & DONALD T. ARIEL (EDITORS): Excavations at the City of David 1978-1985 Directed by Yigal Shiloh, Vol. III: Stratigraphical, Environmental, and Other Reports*

This is the second of the final reports of the excavations at the City of David directed by the late Prof. Yigal Shiloh. The volume contains three parts. The first part consists of detailed stratigraphic reports on the excavations in four areas located in the southern part of the City of David and relating to the later periods: A1, A2, H and K. The second part comprises reports on macrobotanical remains, molluscs and fish remains found in all areas and periods of the City of David. The third part consists of reports on special groups of finds of later periods: Late Roman and Byzantine pottery from Areas H and K; Byzantine and medieval pottery from Areas A1 and G; chalk vessels of the Persian/Hellenistic and Early Roman periods from all parts of the City of David; and two jewelry molds from Areas H and K.
