QEDEM REPORTS 1 (1995)

Qedem Reports 1 and 2 present the final report of Areas A and C at Tel Dor, excavated in 1980-1987. The excavations at Dor provide an unparalleled opportunity to study a major Phoenician harbor town on the eastern Mediterranean coast. The excavations revealed a large planned city of the Persian and Hellenistic periods, built in typically Phoenician techniques and fortified by a strong wall, with continued settlement in the Roman period. This volume includes descriptions of registration and surveying methods, a stratigraphic summary describing the finds of the various strata, a detailed stratigraphic report, a discussion of absolute dates, historical conclusions, a report on maritime and coastal installations, a chapter on the city coins of Dor, and a comprehensive bibliography of Tel Dor and the nearby Tel Mevorakh.

380 pages Price: $60.-

QEDEM REPORTS 2 (1995)

This volume, the companion volume to Qedem Reports 1, presents the finds from Areas A and C at Tel Dor, excavated in 1980-1987. The finds are exceptional in their range and quantity, and are distinguished by the unusually large numbers of imported items. Categories of finds presented here and fully illustrated with drawings and photographs are: Iron Age pottery, local pottery of the Persian period, East Greek pottery, Athenian pottery, imported Hellenistic and Roman pottery, Hellenistic coarse ware, clay figurines, popular cult objects and sculpture, the coins from the excavations, a scarab, seals, stamped storage jar handles, a Phoenician inscription, an inscribed sling bullet, and Greek inscriptions.

512 pages Price: $80.-
